EXPLORATION

500

More than 500 claims in the Abitibi-Témiscamingue region

100%

100% of the mining rights to the Courville property

Partner with Dundee Precious Metals Inc. (“Dundee”) on the Malartic Property

PROPERTIES

COURVILLE

The Courville property consists of 361 claims with an approximate area of 151.82 km². This multitarget property includes the old Pershing-Manitou gold mine, the Thibodeau intrusive complex, and the Jolin shear zone. Investment in works brings the asset value of the property to 4 to 7 million dollars of fair market value, and represents one of the biggest land packages in the prolific Abitibi-Témiscamingue region.

MALARTIC

The Malartic project, consisting of 95 claims, is located in the renowned gold mining township of Malartic. In 2017, Pershimex signed a deal with Dundee Precious Metals for 51% interest in the property. The first part of the agreement over the last 3 years included a total cash payment of \$495,000; 70,000 shares of Dundee capital; and overall field expenses of \$2.5M. To date all of the field work is complete. Pershimex and Dundee Precious Metals are monitoring an economic deposit on this project.

OTHER PROPERTIES

VILLEBON

The property consists of 43 claims covering 1,780 hectares and contains gold-bearing quartz veins of several metres in thickness.

FORSAN

The property is located near the Villebon property. It is composed of 27 claims covering an area of 8 km².

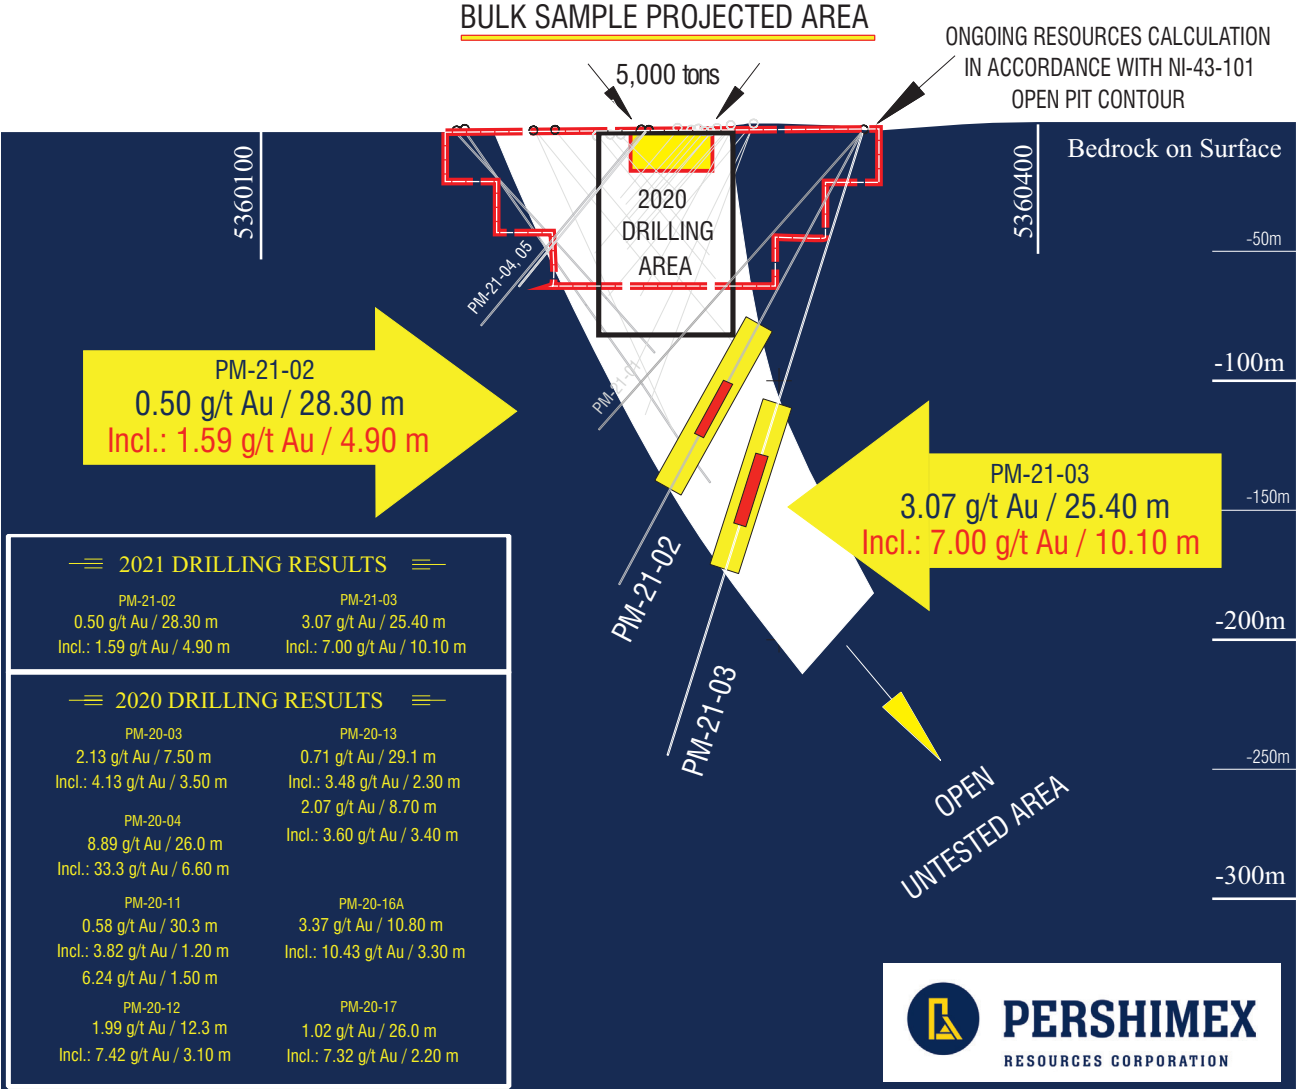

PERSHING-MANITOU GOLD MINE

PHASE 1: (COMPLETED IN 2020)

- Rehabilitation of the former Pershing-Manitou gold mine site belonging, which is one of the province's environmental liabilities.
- Surface drilling to confirm the presence of gold mineralization inside the crown pillar of the former mine.
- Construction of a compliant and safe access road for heavy transport.

PHASE 2: (IN PROGRESS)

- NI-43-101 compliant resource calculation to confirm the presence of gold mineralization in the surface crown pillar of the former mine.
- Validation of the geological model and pit optimization for the permit application for a 5,000-ton bulk sample in accordance with the new regulation (March 2021).
- Deep drilling in the vicinity of the former mine to increase gold mineralization at depth.

BOARD OF DIRECTORS

LOÏC BUREAU, Chairman of the Board

Mr. Bureau holds a college diploma in mineral technology, a bachelor's degree in geological engineering, and a certification in project management. Mr. Bureau was directly involved in the success of Pershimco Resources as the General Operations Manager and currently coordinates the activities of the Mineral Technology Department of CÉGEP de l'Abitibi-Témiscamingue.

ROBERT GAGNON, President & CEO, Director

Mr. Gagnon, President & CEO, earned a Mining Techniques diploma in mining techniques from the Collège de la région de l'Amiante and a bachelor's degree in geology from the Université de Québec à Chicoutimi. With over 25 years of experience in mineral exploration, Mr. Gagnon has developed expertise in the research and processing of high grade gold ore.

SERGE M. RACINE, Director

Mr. Racine is one of the principal partners of renowned law firm Séguin Racine, Attorneys, where he is the co-head of the taxation division. He has been the partner co-head of the tax department at a renowned law firm Séguin Racine, Attorney. He is also a member of the Ordre des administrateurs agréés du Québec. He specializes in the management of companies undergoing planning and reorganization (mergers and acquisitions), particularly in the mining sector.

ROGER BUREAU, Director

Mr. Bureau holds over 40 years of experience in mining exploration. In addition to being the founder of Pershimex, he has started several other mining companies, including Pershimco Resources and McWatters Mine. His areas of expertise are finance, trading and corporate management.
